

Les toiles Sunbrella® désormais en grande laize

Depuis plus de 50 ans, les tissus Sunbrella innovent dans le secteur des tissus techniques. Les acheteurs du monde entier reconnaissent leurs qualités et apprécieront qu'ils se déclinent aujourd'hui en grande laize.

Innovante, design, conçue pour résister aux agressions extérieures, cette gamme XL est idéale pour les rideaux intérieurs et extérieurs, les stores bateaux, velums et pergolas.

Des tissus profondément durables

Les pigments de haute qualité Sunbrella imprègnent la fibre pendant sa fabrication, quand l'acrylique est encore liquide. Il en résulte un fil coloré "à cœur" et un tissu qui offre une tenue, une résistance et une durabilité de couleur exceptionnelles.

Aucune comparaison avec les tissus ordinaires, dont la couleur, obtenue par simple trempage du fil ou de la toile, ne pénètre que la couche supérieure.

Testés selon les normes ISO 105 B02 et ISO 105 B04, les tissus Sunbrella ont obtenu les notes :

- Solidité coloris UV / Colour fastness UV - ISO 105 B02 : 7-8/8.
- Solidité coloris intempéries / Colour fastness weather condition - ISO 105 B04 : 4-5/5.

Incroyablement faciles à vivre et à entretenir

Le traitement de finition appliqué sur tous les tissus Sunbrella repousse les liquides et les salissures. Ce qui simplifie incroyablement leur entretien.

Entretien :

- Les tissus Sunbrella sont lavables en machine à 40°C (sauf Sunbrella Velum : 30°C). Sécher à l'air libre.
- Les tissus des produits non déhoussables sont lavables à la brosse douce avec de l'eau savonneuse (additionnée de 50 ml de Javel par litre d'eau en cas de taches tenaces). Rincer à l'eau claire et sécher à l'air libre.

40°* △ ☒ ☐ ☒ *Sauf Sunbrella Velum : 30°

Des tissus garantis

Dickson Constant garantit l'imputrescibilité et la tenue des coloris de ses toiles Sunbrella Indoor & Outdoor XL pendant 5 ans à compter de la date d'achat du produit fini. La garantie en détail sur le site www.sunbrella.com

Respectueux de l'environnement

Une qualité respectueuse de l'écologie humaine
Labellisés OEKO-TEX (classe II – produits en contact direct avec la peau), les tissus Sunbrella sont produits sans substance identifiée « à risque » pouvant présenter un danger pour la santé, la peau et l'environnement.

Les tissus Sunbrella procurent une protection solaire maximale.

La Skin Cancer Foundation recommande Sunbrella* en prévention des dangers du soleil pour la peau. Les produits d'ombrage Sunbrella, associés à l'utilisation régulière d'une crème solaire, forment un programme de protection renforcé.

*Ne concerne pas les modèles translucides Sunbrella, tel Sunbrella Velum.

Des qualités pour l'air intérieur

Les matériaux utilisés en ameublement intérieur impactent la qualité de l'air intérieur.

La certification Greenguard atteste que les tissus Sunbrella, respectent des normes particulièrement exigeantes en matière d'émissions chimiques. Les tissus Sunbrella contribuent à créer un environnement intérieur sain.

Fiches techniques

Sunbrella® fabrics are now available in extra wide width

For more than fifty years, Sunbrella fabrics have been leading the way for the entire technical textiles industry with ongoing innovations. Buyers all across the globe recognize their qualities and appreciate that they are now available in extra wide width.

Innovative, attractive and designed to withstand all types of weather, this XL range is ideal for both indoor and outdoor shade, as well as boating equipment, vellums and pergolas.

Ultra durable, through and through

Sunbrella fibres are steeped in top quality dyes during the actual manufacturing process, when the acrylic is still liquid. As a result, the fabric's yarn is coloured all the way to the core so its original vibrancy lasts on and on.

There's absolutely no comparison to ordinary procedures whereby the yarn or fabric is simply dipped in dye which therefore only penetrates the outer layers..

Tested to meet ISO 105 B02 and ISO 105 B04 standards, Sunbrella fabrics scores as follows:

- UV colour fastness (ISO 105 B02): 7-8/8.
- Weather condition colour fastness (ISO 105 B04): 4-5/5.

Incredibly easy to maintain

The finishing treatment applied to all Sunbrella fabrics repels liquids and dirt, making them extremely easy to keep clean year after year.

Cleaning:

- Sunbrella fabrics can be machine washed at 40°C (except Sunbrella Velum: 30°C). Let air dry.
- Fabric covers that cannot be removed for washing can be cleaned with a soft-bristle brush and soapy water (add 50 ml of bleach per liter of water in case of tough or stubborn stains). Rinse with clear water and let air dry.

40°* △ ☒ ☐ ☒ *Except Sunbrella Velum: 30°

Guaranteed to last

Dickson Constant guarantees Sunbrella Indoor & Outdoor XL fabric's colour fastness and rot-proofing for the five years following the purchase date.

For details regarding this warranty, visit www.sunbrella.com

Environmentally friendly

A quality that meets human-ecological requirements
Awarded with the OEKO-TEX label (class II – products with direct contact to the skin), Sunbrella fabrics are made without any identified harmful substance that could be a danger to health, skin, and the environment.

Sunbrella fabrics provide excellent sun protection.

The Skin Cancer Foundation recommends Sunbrella* as an effective means for preventing skin damage from UV rays. Regular use of shade-creating devices made with Sunbrella fabrics, along with regular use of sun screen, boosts protection against the sun's harmful rays.

*except translucent Sunbrella fabrics, such as Velum fabric.

Improving the quality of indoor air

The materials used on indoor furniture have a direct impact on the surrounding air quality.

The Greenguard certification proves that Sunbrella fabrics meet particularly tough standards in terms of chemical emissions. Sunbrella fabrics help to create a healthy indoor environment.
